Santa Clara, CA | (669) 204-6264 | awni.alquraini@gmail.com | [linkedin.com/in/awni-alquraini/](https://www.linkedin.com/in/awni-alquraini/)

PROFESSIONAL SUMMARY

Second-year Computer Science and Engineering student passionate about low level programming. Proven ability to design and implement complex systems, with hands-on experience in Large Language Model (LLM) tooling, and collaborating cross-functionally to drive meaningful feature impact.

EDUCATION

Santa Clara University, Santa Clara, CA

Expected graduation: 06/2028

Bachelor of Science in Computer Science and Engineering

- Relevant Coursework: Advanced Programming; Data Structures; Computer Algorithms; Computer Networks; Embedded Systems; Logic Design, Electric Circuits

PROJECTS

Project: NES Emulator

- Resolved a complex engineering challenge by reverse-engineering proprietary console architecture, demonstrating a strong problem-solving mindset and autonomy. Engineered a behavioral emulator in C++, requiring extensive, self-directed research into the specifications of the NES 6502 CPU, 2C02 PPU, and cartridge mappers. Utilized GitHub Copilot to generate robust testing scripts for verifying CPU and PPU state changes.

Project: MealSense

- Spearheaded an AI-based recommendation tool, MealSense, leveraging nutritional goals and dietary restrictions to generate optimal daily meal plans, demonstrating experience with building developer experiences that make coding accessible to everyone. Developed the full-stack application, including the front-end (React Native) and utilized a LLM structured response API to create recommendations. Currently researching how to implement a custom Convolutional Neural network to support the recommendation system.

WORK EXPERIENCE

Retail Sales Specialist

07/2025-01/2026

Apple, Inc., Santa Clara, CA

- Leveraged extensive technical expertise in Apple hardware and software to diagnose customer needs and present tailored, comprehensive solutions to non-technical audiences; Consistently Top 10 in the store at Accessory Attach and Customer Satisfaction scores.
- Proactively identified and drove revenue growth by establishing a consistent, quarterly feedback loop with managers to refine strategies; Led to a ~20% gain Quarter to Quarter for Business Introductions and Apple Care attach.

SKILLS

Languages: C, C++, ARM32 Assembly, Python, Java | **AI/ML Tooling:** llama.cpp |

Applications: Git/GitHub, IDA, Ghidra(+ MCP), Excel, Matlab, Adobe Lightroom, Adobe Premier Pro | **Operating Systems:** Windows, MacOS, Linux
